<b>Pressure range:</b>	
Pressure	3 / 6 / 10 bar
Initial pressure	freely adjustable or via compressor
Model	as individual vessel or complete unit in container

Subject to technical changes - only for information

### Your advantages

- Modular design
- Selection according to project
- Connected by our specialists
- Passive / active pressure maintenance

With different pressure conditions or system partitions, for example, volume expansion should not be underestimated.

Increasingly larger buffer volumes must also be

taken into account during temporary measures in the case of regenerative systems. With mobile expansion vessels from Hotmobil you will always be on the safe side.
